from the old times on doubtless ethics presents an important part of philosophy mainly as guidance for solving practical problems in the times of big social changes the ethical questions arise

anew the current times of scientific and technological radical changes of globalization and instability demand up to date ethical discussion and answers according to all the differences in the world which occur because of the media and technological capabilities present in the consciousness of ordinary people one should ask himself how to find the directions of the action and activity of an individual of people of humanity and as a result of the rapid development of scientific and technological power the things are becoming more and more complicated and potentially dangerous what was in the past solved only by god and by the nature itself it is today also essentially influenced by humans themselves hence the ethics and morality are far more important as they used to be and they concern the survival of humanity as such however the authors in this book have been trying to face these problems
