during wwii many german generals traded and sold stolen works of art to
private art collectors around the world and made small fortunes for
themselves one general simply knows as herr general did the same but he
knew he would not survive the war so he hid his stolen art in two
inconspicuous locations and secured his money and wealth in a swiss bank
account herr general then prepared a written manuscript in three languages
and secured it in a leather bound portfolio the portfolio was in fact a written

treasure map leading one to the stolen art and wealth that he had accumulated years after the war the portfolio surfaces and then the scramble begin this story is that quest for herr general s art and treasures based on his portfolio

traditionally the study of internal combustion engines operation has focused on the steady state performance however the daily driving schedule of automotive and truck engines is inherently related to unsteady conditions in fact only a very small portion of a vehicle s operating pattern is true steady state e g when cruising on a motorway moreover the most critical conditions encountered by industrial or marine engines are met during transients too unfortunately the transient operation of turbocharged diesel engines has been associated with slow acceleration rate hence poor driveability and overshoot in particulate gaseous and noise emissions despite the relatively large number of published papers this very important subject has been treated in the past scarcely and only segmentally as regards reference books merely two chapters one in the book turbocharging the internal combustion engine by n watson and m s janota mcmillan press 1982 and another one written by d e winterbone in the book the thermodynamics and gas dynamics of internal combustion engines vol ii edited by j h horlock and d e winterbone clarendon press 1986 are dedicated to transient operation both books now out of print were published a long time ago then it seems reasonable to try to expand on these pioneering works taking into account the recent technological advances and particularly the global concern about environmental pollution which has intensified the research on transient diesel engine operation typically through the transient cycles certification of new vehicles
